## INTRODUCTION

First of all let me congratulate you for purchasing this report, this can be your holy grail to recovering all you have ever lost to the bookies if you can correctly utilize what I would be showing you in a few minutes from now.

This is not just an ebook on how to start winning football bets, but how to do it as a professional and stand out of the crowd.

Chances are that you don't know me and so you don't feel like a robot is the one writing this, let me do a brief introduction

My name is **Steve Ralkens** and below is what I look like

I am a football trader, entrepreneur and marketer, I presently live in Lekki, Nigeria and I am doing just fine as every other human being.

Still want more info? I can go ahead to mention my age, religion, bank balance and how much I make in a month but I don't think those are relevant here.

Just in case you have any questions just email [support@kratilabs.com](mailto:support@kratilabs.com)

I will advise you keep this ebook safe and always come back to it as a reference because what I would be showing you in a few minutes will completely blow your mind.

As at the time of writing this ebook, I make nothing less than N300,000 monthly profit from football betting alone without losing anything, yes believe me, there is a thing as betting without losing, it exists and few pages away you would be learning this.

So now let's begin and crush this!

# MODULE #1

## Why Nigerians fail at football betting

Nigerians fail woefully at football betting, and I shouldn't be the one telling you that, in fact the bookies business is one of the best right now that many sports betting companies are coming up everyday, think about this.

If the business isn't profitable, then they wouldn't be so many companies coming into the business.

There are myriads, I mean truckloads of reasons if not countless why Nigerians fail woefully at football betting but for some reasons I am going to list the very five which I consider the main of them

### #1 Get rich quick mentality

Most people want to get into the game and increase their bank balance to 7 figures in the next month which is not possible. The game was not designed to work that way.

### #2 The fixed odds, fixed match mentality

Forget it. I mean if you hear the phrase **Fixed Match** simply run. They don't exist, at least not for **lazy youths** like us. For goodness sake those stuffs were coined by some smart Barons who use them to scam innocent and people like you and me.

### #3 No game plan

Most sport betting losers have no game plan to follow up and that is simply why they fail woefully with the game. You have to know what to invest in a particular month, what to stake in a particular day, the risk behind each game etc.

#### #4 There are not pro punters

More than 95% of Nigerian punters are not professional football traders, all they do is lucky guesses by just jumping into any betting shop, select 10 random games, slap a stake on it and call it a day. The result is always a loss at the end. And chances are that you reading this are one of the lucky guessers 😊.

#### #5 Too dependent on sport prediction sites

Now don't get me wrong, I didn't say it is bad using those free sport prediction sites but you would be doing yourself more harm than good by depending too much on their predictions. For goodness sake most of their tipsters are just ordinary people who know nothing about hitting huge *kesh* from football betting and growing bankrolls.

Now these five are the very top reasons why I see Nigerians fail woefully at football betting, and keep making the bookies rich.

Let's face it, football betting is terribly frustrating that you may be tempted to take your own life and I was almost a victim of this, luckily I didn't do it.

I have helped more than 100 guys grow their bankroll with football betting (not much because I don't really like revealing what works for me) and more than 70% of them admitted that they were already at the verge of suicide.

But not to worry, by the time you fully understand what I have in store for you, I bet you are going to locate me for a thank you message.

I am going to show you **how the big boys do it** and how you can increase your bankroll with this in a small space of time

## Module #2

# How to copy the whites

No, I don't mean copying their nasty lifestyle, nor the grey sides.

I mean copying the way they deal with matters concerning the subject of this manual.

Remember I told you earlier that I failed woefully at football betting and believe it or not in 2020 alone I spent nothing less than N1,000,000 on football sources.

I was consistently discovering new sources and when I paid them money for their so called **fixed games**, they ended up disappointing me.

How did I know sources that worked? I would stay with a newly discovered source for a month to determine if there are really good or not. I go through their winning potential and after all these research, I discovered two sure and proven sources.

After staying with one of them for a month, I had 200% pure profits. I had invested N100,000 and I got N300,000 at the end of the month.

But mind you this service wasn't cheap, not even a little, I had paid €405 for just one of the sources (Approximately N243,000) for just 30 days access, this source is called Suregoldtips.com and they have good win rates so I stayed with them for some time.

They also offer just 3 day access for €80 (approximately N48,000) and if you doubt it check the image below.

TEST MY TIPS

It is a website owned by a Brazil based tipster named Ronald Greene, the guy is really good at football betting and the first person to help me increase my bankroll after football betting almost ended my life.

*Below are screenshots of their latest results*

My Results / Updated Daily				
DATE	LEAGUE	TEAMS	MY PICK	OUTCOME
2022 October 23	AUSTRIA: BUNDESLIGA	AC Wolfsberger - Altach	Over 2.5	<b>Victory</b>
2022 October 22	FRANCE: LIGUE 2	Sochaux - Quevilly Rouen	Home Win	<b>Loss</b>
2022 October 21	GERMANY: 2ND BUNDESLIGA	Hansa Rostock - Kaiserslautern	Both To Score	<b>Loss</b>
2022 October 20	SPAIN: LALIGA	Almeria - Girona	Both To Score	<b>Victory</b>
2022 October 19	ENGLAND: PREMIER LEAGUE	Newcastle - Everton	Home Win	<b>Victory</b>
2022 October 18	AUSTRIA: OFB CUP	Tirol - Rapid Vienna	Over 2.5	<b>Victory</b>
2022 October 17	SWEDEN: SUPERETTAN	Utsiktens - Halmstad	Over 2.5	<b>Victory</b>
2022 October 16	AUSTRIA: BUNDESLIGA	Sturm Graz - AC Wolfsberger	Over 2.5	<b>Victory</b>
2022 October 15	ENGLAND: CHAMPIONSHIP	Watford - Norwich	Both To Score	<b>Victory</b>
2022 October 14	NETHERLANDS: EERSTE DIVISIE	Venlo - Dordrecht	Over 2.5	<b>Loss</b>
2022 October 13	WORLD: CONFERENCE LEAGUE	West Ham - Anderlecht	Over 2.5	<b>Victory</b>
2022 October 12	FRANCE: NATIONAL	Avranches - Martigues	Both To Score	<b>Victory</b>

After paying ₦243,000 every 30 days for three whole months (I continued subscribing because I was seeing profits), although it was working and this was profitable

*I wanted to learn how to do this stuff myself so I can stop giving money to Ronald Greene*

So one day I slide into his inbox and told him to coach me. He outrightly told me he doesn't coach student as he receives many of such requests which he turns down but after some persuasion for months he agreed to do.

On grounds that I would pay \$2,000 (N1.4m) flat, and he is not ready to deduct anything from it. I took the risk and paid the cash and Ronald Greene taught me majority of the things I have known from football betting since then.

Some of the stuffs I learnt from him and which I would be revealing to you here are

- The blue stake strategy
- The loose proof formula
- Turning 3 odds daily into a fortune of millions even if you are presently broke

There is a lot to learn and keep your mind blown, I told you this manual would be a blessing to you didn't I? Let's keep going.

## **Module #3**

# **Football trading or football betting?**

If you are still loosing your hard earned cash to the bookies right now then this f\*cking fact I am about to tell you is certain.

**“You aren’t treating football as a business”**

Let’s be serious here. This should be seen as a business; at least you are investing some cash on it.

**Are you presently betting on football or trading football?**

***If you just walk to any betting shop and place random bets THEN YOU ARE BETTING NOT TRADING.***

***If you simply pick some familiar teams which you believe are good and place favorable bets around them THEN YOU ARE BETTING NOT TRADING.***

***If you just visit any football prediction site and scoop out their daily forecast THEN YOU ARE BETTING NOT TRADING.***

***If you simply copy games from people who you believe to be FOOTBALL BETTING GURUS to rebet THEN YOU ARE BETTING NOT TRADING.***

***If you are still doing lucky guesses with football betting THEN YOU ARE BETTING NOT TRADING.***

Now what do I mean by trading football?

Come to think of it, when you want to start a business what do you do?

- \* ***You determine the startup capital***
- \* ***You determine the office location***
- \* ***You determine the market competition***
- \* ***You determine your advert spend***
- \* ***You determine your employee payroll (if you'll need that)***

Same applies to football betting, if you want to make real money from football betting then just like a real business, you should.

- \* ***Know how much to stake in a month***
- \* ***Determine how much to stake in a day***
- \* ***Determine the risk factor within every game***
- \* ***Have a simple backup/recovery game***
- \* ***Know how to scale up and grow your bankroll***

So from now you should take football betting more serious and be very meticulous in every of its activity

# Module #4

## What you should be doing

The shit gets more intense here. Believe it or not, you have been doing it way way wrong all this while. And here is the magnificent trio of what you should start doing now, like now now 😊

***Do not accumulate more than 3 games in a single slip***

***Stop the lucky guesses right away***

***Play 2 – 3 odds everyday***

Now before you scream **WARAFAK** do you mean Steve?

This is not rocket science, it is a damn easy thing; so easy that even ***anybody*** can do it.

***Do not accumulate more than 3 games in a single slip***

Why on earth do a good number of broke guys take their brokenness to sport betting? Accumulating 20 games with a stake of N200 and expected winning of N1,000,000 is going to take you nowhere.

You are only gonna get frustrated by your lose day after day.

Now before you say ***BUT ITS WORKING FOR SOME PEOPLE***, like it worked for Chukwudi the Mechanic and now he is in Dubai enjoying life.

This kind of shit works once in a blue moon, like once in several years, and you don't want to wait that long do you? We are talking about quick results here not a ***try your luck*** kind of thing

Besides I am going to show you how you can successfully scale 3 odds everyday to huge sums of money in no time even if you are a beginner without having to wait for literally years to make huge money.

Stop doing that shit immediately man. Real punters who net big cash from this game **don't accumulate more than 3 games on a slip**, anything above that is for hungry wolves with get rich quick mentality.

### **Stop the lucky guesses right away**

Why on earth are you still sticking with this? Stop the lucky guesses and concentrate on what's working.

**Lucky guesses**, the term is self explanatory, but just in case you don't understand this, it is simply betting on games you really don't know much about but believe they are going to work.

It's like sighting **Manchester United V. Arsenal** on the fixtures and placing a **Both Teams to Score** bet when you really don't know if the game is really gonna end that way.

### **Play 2 – 3 odds everyday**

Now I am not just talking of any 2 – 3 odds you get your hands on. There is a unique system we use to research this stuff and few pages away from here I will show you how you can start doing this and grow your bankroll.

It is contained in the **loss proof strategy** module of this report which we use to crush at least 140%+ ROI every month from the bookies without leaving any cash on the table.

## Module #5

# How to stake using the blue stake strategy

Now you have stepped into the Holy Grail called **The Blue Stake Strategy**. This is a powerful staking method that if you learn how to perfectly utilize it, then you shouldn't have to worry about money again.

The bookies can legally turn into your ATM machine. Using the blue stake strategy, you can never lose money to the bookies.

Think of it, **BETTING WITHOUT LOOSING**. Many people will never believe that is possible but I am going to show you how possible that is exactly.

Here is simply what this amazing blue stake strategy is all about

- \* ***Determine your investment for the month***
- \* ***Divide it by 30 days for the month***
- \* ***Stake 2 – 3 odds using the loose proof formula***
- \* ***Rinse and repeat***

I know your mouth may still be hanging open in confusion so let me clear this up for you.

Remember I told you to start making real money from football betting you have to take it as a real business.

Now in business we have investment and I shouldn't be explaining that here as you should already know what it means.

I can boldly say more than 95% of Nigerian punters don't determine the money they are going to gamble with in a whole month, *now tell me why them no go fail* 😊

They simply gamble and gamble and before they discover, they have already spent a whole lot of cash betting on football without any profit or income to show for it.

Since I said we would be taking this as a business, and in other to track down our performance against the bookies whether we are at a win or lose, **we have to know exactly what to stake and how to stake**, and that is exactly what the blue stake strategy helps us with.

By following the first step you simply divide your monthly stake by 30

Let's say you want to invest N30,000 this month into football trading, by the time you divide it into 30 days in a complete month, that would be at N1,000 per day which means your stake everyday for the month shouldn't exceed N1,000.

## **Are you following?**

Now after determining our stake for the month and dividing it by 30 so we can know the exact amount to stake everyday; we have to stake our daily stake on 2 – 3 odds, I don't mean just any 2 – 3 odds but 2 – 3 odds that have a winning probability of nothing less than 94%, there are the exact ones I paid N240,000 for monthly but I am going to teach you how to spot them for free by yourself.

Now over to the next module which is the loose proof formula, the proven formula where losing bets is not an option 😊

## Module #5

### The lose proof formula explained

Now that is not just a name. This formula is simply loose proof, loose proof in a way whereby you simply cannot loose.

It goes hand-in-hand with the blue stake strategy and these are the two main things you really have to master.

Let me explain this.

After understanding the exact strategies explained in the **Blue Stake Strategy**.

#### Now determine your daily stake amount.

In this small case study, I am going to use ₦30,000 as our monthly budget and ₦1,000 as our daily stake for everyday of the month.

You are to simply stake ₦1,000 on three odds and if it is a win you will get ₦3,000 of which ₦2,000 would be profit.

Now, using the 2 – 3 odds strategy I am going to show you soon, if in a month we played a total of 30 games of 3 odds everyday and we won 25 games and lost 5 games

Let's say ₦2,000 profit X 25 = ₦50,000

Now you would have a profit of ₦50,000 and still have a capital of ₦25,000 (₦5,000 was lost) = ₦75,000 from a ₦30,000 investment just within seven days

Now in order to scale up your way to more money fast, you can simply increase your monthly stake for the month to N60,000 the next month of which N2,000 will be the daily stake budget and with this ***Blue Stake Strategy and Loose proof strategy*** you can scale your way to 6 figures and even 7 figures fast from just football trading.

# **Module #7**

## **The money management module**

Money management is necessary for the pro punters. Although the amateur punters don't do this and thus they won't really understand how it works.

This Module is more advanced and not advised for beginners. I wouldn't advise you go with this module immediately you start cashing in using the loose proof formula because you wouldn't understand how it perfectly works.

It simply works this way, when you win a bet using the loose proof formula, you simply increase your stake the next day and if the next day is a loss, you revert back to your previous stake, but if it is a win, you still increase the stake and scale up.

I know this is kind of complicated and sounds somehow difficult to understand but if you perfectly understand this then you can scale your monthly sports betting investment to even 500% ROI.

### **Now let me use figures to make it clearer**

Using N30,000 as your monthly investment of which N1,000 will be our daily stake according to the blue stake strategy.

Now let's say you stake N1,000 on a three odd today which gives you N3,000 of which N2,000 is a profit.

You simply keep the N1,000 which is our capital aside and stake your N2,000 profit the next day on another 3 odds of which if you win you are going to get N6,000; now you can stake N3,000 and keep the N3,000 profit + the earlier N1,000 which will give us N4,000 profit while still trying to scale up the business.

I know this looks more advanced and that is why I advised it is not for stark beginners but those who have had a little bit of experience while trading football.

It is the simplest way to increase your bankroll while trading football.

Don't view this as too difficult; I always state that it is so easy, easy in such a way that anybody should be able to do this.

This is something that is presently working for me and I see no reason why it shouldn't work for any other individual.

## WAIT A MINUTE . . .

I am not just blabbing words here, if you haven't understood the ***loose proof formula*** yet then go back to **Module #5** and grasp exactly what I am trying to tell you there.

I can boldly say that you **CAN NEVER** loose money trading football, if you follow what I am trying to tell you here, take it or leave it I mean it.

## Module #8

# How big tipsters make cash and how you can replicate this

Take it or leave it, there is a whole lot of cash in football betting, lots of cash that you may even think it is illegal.

Now I am not just talking about the betting aspect, I mean showing or educating people on how to bet the smart way using my guaranteed 2 – 3 odds daily strategy which I would be showing you in module 9 of this life-changing report.

Now, a lot of guys are doing this and making lots of cash from it. Do you know selling just 3 odds to people can turn you to a millionaire?

If you remember, earlier in this report I told you how I was paying ₦240,000 monthly to a source called suregoldtips.com which supply 2 – 3 odds daily, this simply means when you divide the monthly payment of ₦240,000 by 30 days you simply get ₦8,000 which means many people over the world are paying this guy ₦8,000 everyday just to get 2 – 3 odds from him and I was one of such people paying this money.

Now think of it, if many people can really afford to pay ₦8,000 every single day for just 2 – 3 odds doesn't that spark a business in your head?

Now let's see how much this guy charges again

Package	Price	Value	Delivery	Action
Pay For 31 Tips	405 <sup>EUR</sup>	/31 Tips	Tips are sent instantly to your email	Buy Now!
Pay For 3 Tips	80 <sup>EUR</sup>	/3 Tips	Tips are sent instantly to your email	Buy Now!

Approximately ₦240,000 for 30 days and ₦48,000 for just 3 days

This simply means, even if you decide to charge just ₦20,000 per month for your own 2 – 3 odds daily and you have just 25 subscribers, that leads you to a whopping ₦500,000 every month which many people do not make as salary and you can keep getting this money every month once the subscribers keep subscribing.

And I don't have to tell you how **people are in the hunt for fixed matches which don't even exist.** If you can get hold of a good number of them and educate them on what they are doing wrong, teach them the ***blue stake strategy and the loose proof formula*** and how they can replicate this into their present betting system to grow their bankroll they will appreciate you and be happy to pay you for that.

All you have to do is simply build confidence with the subscribers so they can see you as an authority and you keep supplying them these games months after months and make real money.

Buying games are expensive, especially small odds with a high winning probability, the ones I am going to show you exactly how to research for them in the next module of this report so read on.

# **Module #9**

## **How to Spot 2 – 3 sure odds daily**

This is where you have to pay close attention as you would be learning how to get the games you would be playing right here.

### **THE SYSTEM EXPLAINED**

During this illustration my selections are from **www.betexplorer.com** and bets placed are on **www.bet365.com**

I use bet365 because of the bigger odds. However you can still use local bookies like Nairabet, Merrybet and Bet9ja.

I also use bet365 because of their large varieties of betting market which makes it easy to find the qualifying bets.

**The market we will be selecting is the over 1.5 goal market**

I will show you the process to select the qualifying bets so what we have to do now is simply **look at the head to head history of each fixture and the form of the teams playing.**

***Now you are going to carefully follow these steps and instructions below in looking for qualifying bets***

- 1. What we need to see in the head to head is that all of the last five matches between these two teams have finished with at least 2 goals or more, else it is not a qualifying bet; and if there are not up to five matches played in their head to head history then it is not a qualifying bet.***

2. Look at both of the teams last five games results. Each team should have at least 4 or more matches that have finished with at least 2 goals or more, else it is not a qualifying bet. If there are not up to 5 matches in the last five games of any of the teams, then it is not a qualifying bet.

Now note these two steps above because they are the key to the success of the systems.

Any fixture you pick must conform to these two rules above?

Now, let's move on.

### Step-By-Step Guide to Picking Qualifying Bets.

Go over to [www.betexplorer.com](http://www.betexplorer.com) > Click on "Soccer" > Then click on "Show all today matches"

SOCCER				
NEXT 10 SOCCER MATCHES				
Chile: Chilean Cup		1	X	2
21:00	D. Concepcion - Nublense	2.15	3.23	3.04
21:00	La Serena - Copiapo	2.34	3.27	2.69

Otelul	Steaua Bucuresti	2:0	3.88	3.22	1.83	details	17.10.2008

From the above screenshots you can see that the fixture is a qualifying bet because,

- > Home team "Otelul" has 4 of the last 5 matches finishing with 2 goals or more
- > Away team "Steaua Bucuresti" has all of the last 5 matches finishing with 2 goals or more
- > Head to head history all of the last 5 matches finished with 2 goals or more

Can you guess how this match ended?

Results of this match was 1-1 which is OVER 1.5 goals = WIN

And before you say *na lie*, here is a screenshot of the result.

20:00	Otelul - Steaua Bucuresti	1:1	(0:1, 1:0)
-------	---------------------------	-----	------------

This stuff works this way, once you find qualifying bets, simply accumulate **three qualifying matches** for that day which would amount to grossly 2 – 3 odds. Go over to your bookmaker (local or international) and place your bets.

***Typically you only need to accumulate about 3 matches or less to get 2 – 3 odds that you need to stake.***

Now before you think I am just teaching this without doing it myself, here are some of my recent winning screenshot with bet365

The screenshot displays four successful treble bets from the bet365 mobile app. Each bet is a treble of 'Over 1.5' goals for three different matches on the same day. The detailed view on the right shows the specific matches and the resulting return.

Bet ID	Date	Time	Stake	Return

## **Module #10**

### **Win and scale up**

Yea yea we are rounding up on this and I believe you have had an awesome experience so far.

Now I want to make one thing clear, there is something you really have to learn.

### **Scaling up your profits.**

This is where many fail. Lots of guys after cashing out on successful months spend their money carelessly and even the capital meant to be invested back into the next month.

Like I said, you have to treat this as a business and always make sure you spend your money wisely.

The only thing that can take you from N5,000 – N5,000,000 from your small business is your ability to scale up and reinvest back into it

Take note of this.

## **ACTION**

Now one this is certain, after reading the pages of this report and you don't take action, nothing will happen.

You will never make more money if you fail to take action.

Don't get paralyzed by fear, take action, take action.

May God help us all.
